

# Personal Daily Horoscope (pDH /pTH)

With deep personal concern, we must inform you that Bernd Singer, long-time author and member of the editorial staff of the German Uranian Journal ([Hamburger Hefte](#)), passed away on 20 August 2019 shortly after the current Journal went to press. Bernd Singer has been known to our readers for 30 years. Since 1989, Bernd has demonstrated his skills in more than 100 articles in our Hamburg Journal. Bernd was co-founder and board member of the *Astrological Study Centre Hamburg School* ([Astrologisches Studienzentrum Hamburger Schule](#); 2015), which is committed to the tradition of the *Astrologers Association Hamburg School* ([Astrologenverein Hamburger Schule](#); 1925). Members and guests of the Study Centre have always enjoyed his lectures with great attention. Bernd Singer's way of performing astrological lectures was based on clear evidences paired with a pleasant humour and very friendly charisma.

Bernd Singer began his studies in 1981 with the so-called "classical or traditional astrology" and the Munich Rhythm Theory (Münchener Rhythmenlehre). In 1987 he continued his studies with the Uranian method. In 1994 Bernd became editor of the *Hamburger Hefte* Journal for the section "working tasks" (Arbeitsaufgaben). In 1997 his astrology book "Romy Schneider" (the astrological biography of an actor) attracted a lot of attention. This textbook gives an overview of the [theory, technique and analysis of symmetrical astrology](#). One of Bernd's goals was to highlight the similarities between "traditional astrology" and the Uranian Astrology. For this reason he didn't use Uranian planets in his book. Bernd Singer oriented himself strongly to the writings of Alfred Witte and in particular to Ludwig Rudolph, whose textbook "Leitfaden der Astrologie" Bernd Singer regarded as the most successful textbook of the Uranian technique and therefore became a model for his own book. At the 4th conference of the **International Uranian Fellowship**, Hamburg 2009, Bernd Singer also became known abroad with his lecture "[Personal Daily Horoscope \(pDH\)](#)".

**the personal daily horoscope**

## The year

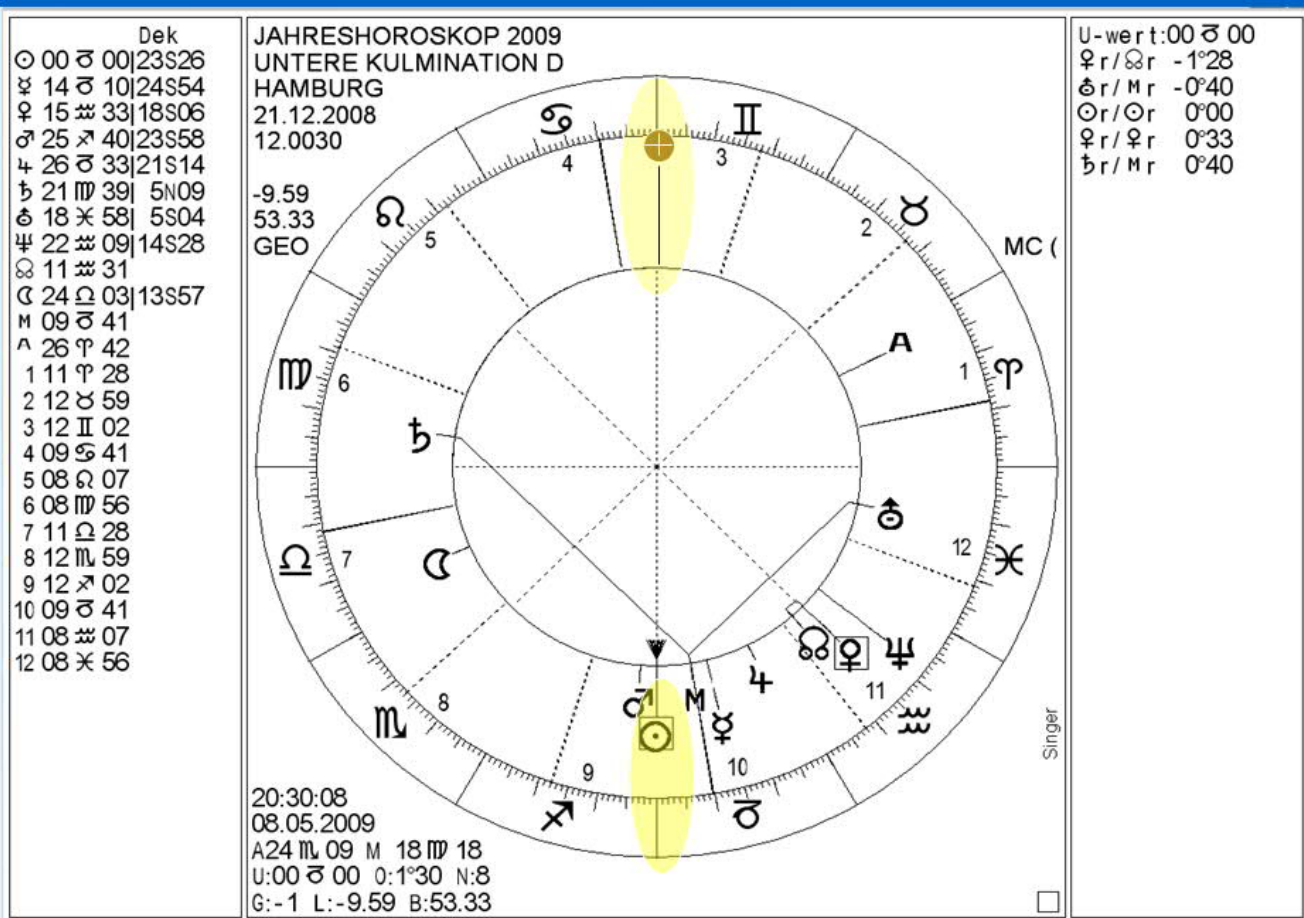

- for northern latitudes of the earth will begin with/by culmination of sun on  $0^\circ$  Capricorn (=  $270^\circ$ ) of the zodiac. The earth then will be opposite to  $0^\circ$  Cancer (=  $90^\circ$ )
- This is the shortest day and the longest night of the year. From now on the days will become longer until sun will be on  $0^\circ$  Cancer.

The yearly iterating motion is called

**Revolution - the circular motion**

The **lower culmination of SU** (Capricorn-Ingress 270° = beginning of the mundane cycle of the year)

pTH  
Analogy

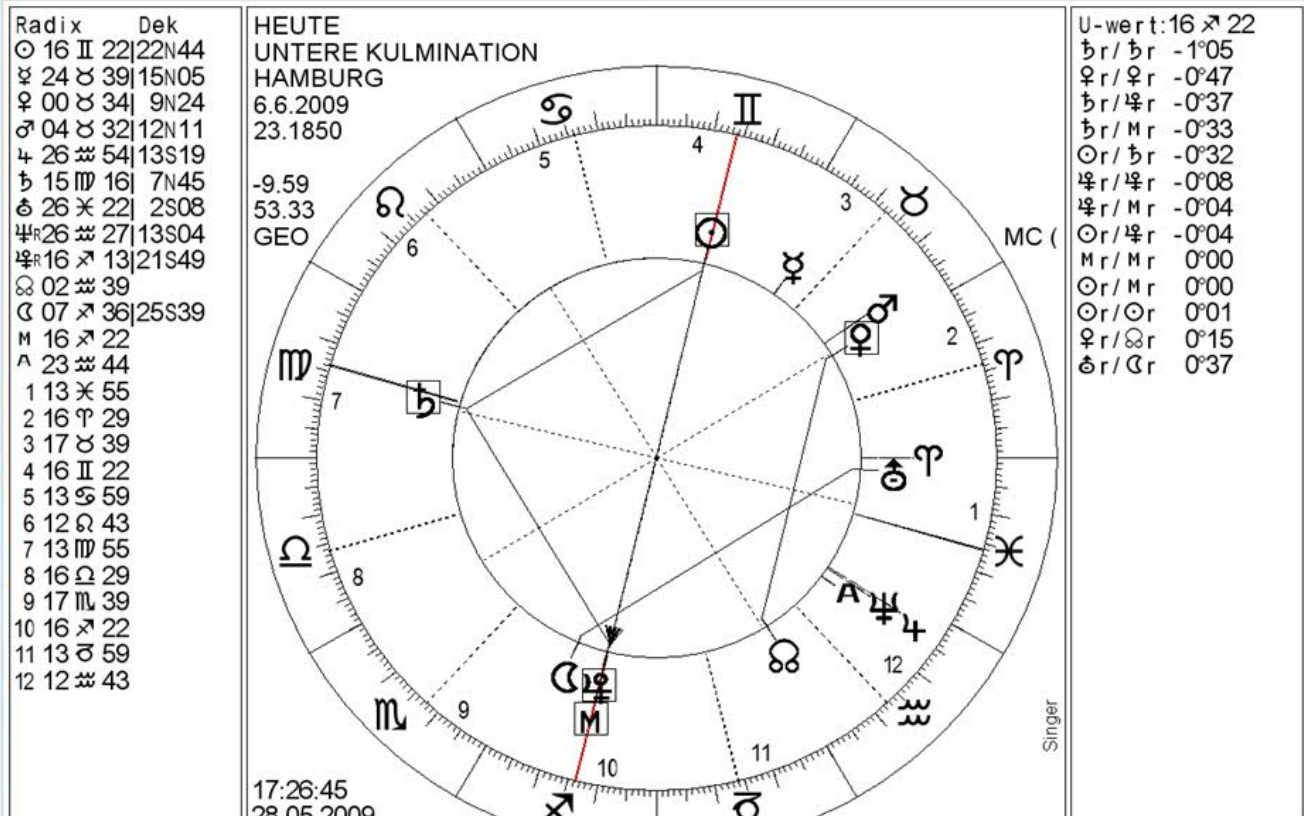

## The day

- The new day begins by the lower culmination of sun (opposite) to MC.
- This means, that the point of night - for the calculated place - will close the last cycle of day and a new day begins; the radiation by the sun will become more intensive the further the earth rotates - until the highest point of day to conjunction of MC with the SU is arrived.

This daily repeating process of motion between day and night is caused by the

**rotation of earth**

The daily lower culmination of SU always is in opposite to the MC  
(mundane – present-day = today`s – day`s horoscope)

The day of today is signified by earnest based on partnership (SAT4 -7.H-) common (CU amicably pleasant meetings/connections of both sexes (male and female) (KN/VE 11/2. H; T8 VE/MA 2. H); Thematic concerning creative and artistic material or mental/spiritual possession; MO/UR gives eventful ideological hours 9/1.H

## The birth

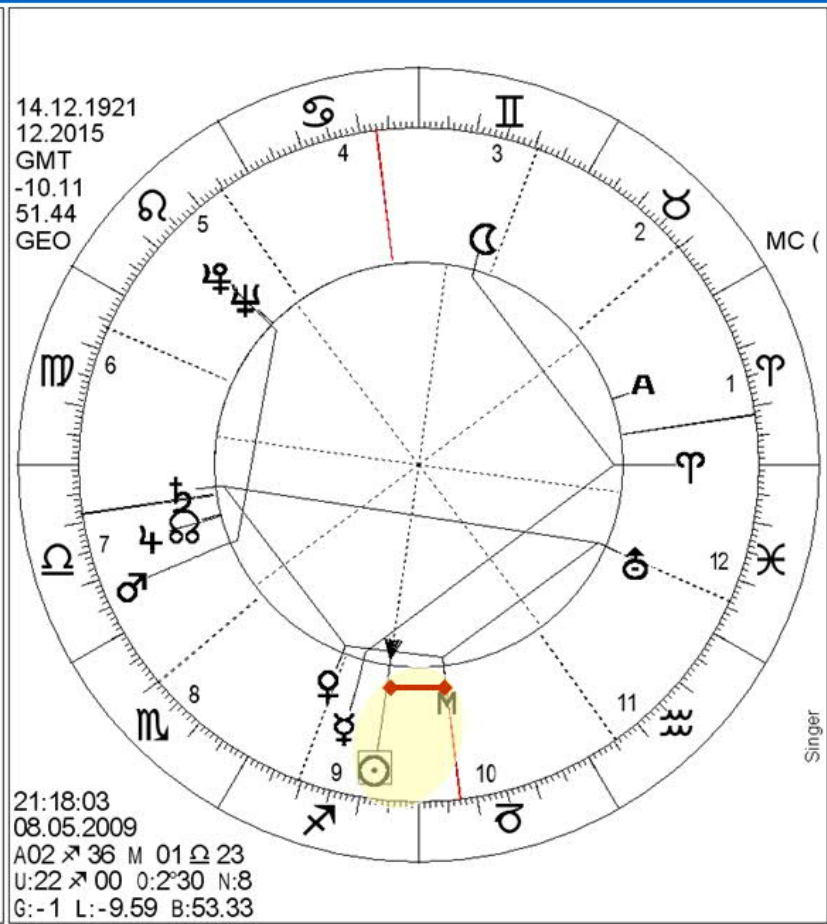

- At time of birth - at a fixed geographical place - there is given a special relation between sun and MC, mathematically expressed as a difference.
  - (SU - MC)
- Out of the structures of the single factors of these differences (SU-MC) later on all the bodily and psychological experience will be deduced.
  - the personal framework then now is defined by this.
- The factors of horoscope with their structure jointly provide the potential which during all the life time will be carried on in the remembrance of the progressing sun.

At the time of birth SU and MC are related in a special proportion (rate) of difference (in this case:  $SU - MC = 15^{\circ}14'$ ).

The angles (aspects) used by classical astrology – for instance:

denomination	difference	
➤ Conjunction	0°	T1 (continued 2-division)
➤ Opposition	180°	T2
➤ Square	90°	T4
➤ Semisquare	45°	T8 \ T16 = 22°30 , T32 ...
➤ Trine	120°	T3 (continued 3-division)
➤ Sextile	60°	T6 \ T12; T24 ...

Here the values constitute the differences between the factors involved.  
Deviations (Orbs) are tolerated.

A theorem of Alfred Witte tells us:

- **Same differences will result in planet pictures symmetrically grouped around a jointly axis.**

*(It does not matter if the selected pairs of differences conform the classical angles (aspects) -, which by experience are strong but often do not explicate all things.)*

- ✓ Differences are arcs of time, which seem to be ready to take effect by the progressed (true) sun arc.
- ✓ The midpoint of the difference shows the mixture concerning the contents of the involved factors.

In the example chart these differences are nearly even (equal) via the cardinal cross (by T4 = 90°):

$$\text{MC} - \text{MO} = \text{JU} - \text{SU}$$

$$66^{\circ}48 = 66^{\circ}51$$

By conversion (transformation) of the mathematical equation there for instance are various possibilities:

$$\text{MC} + \text{SU} - \text{MO} = \text{JU} - \text{Wellness in the public}$$

(occupied sensitive point)

And furthermore as sums

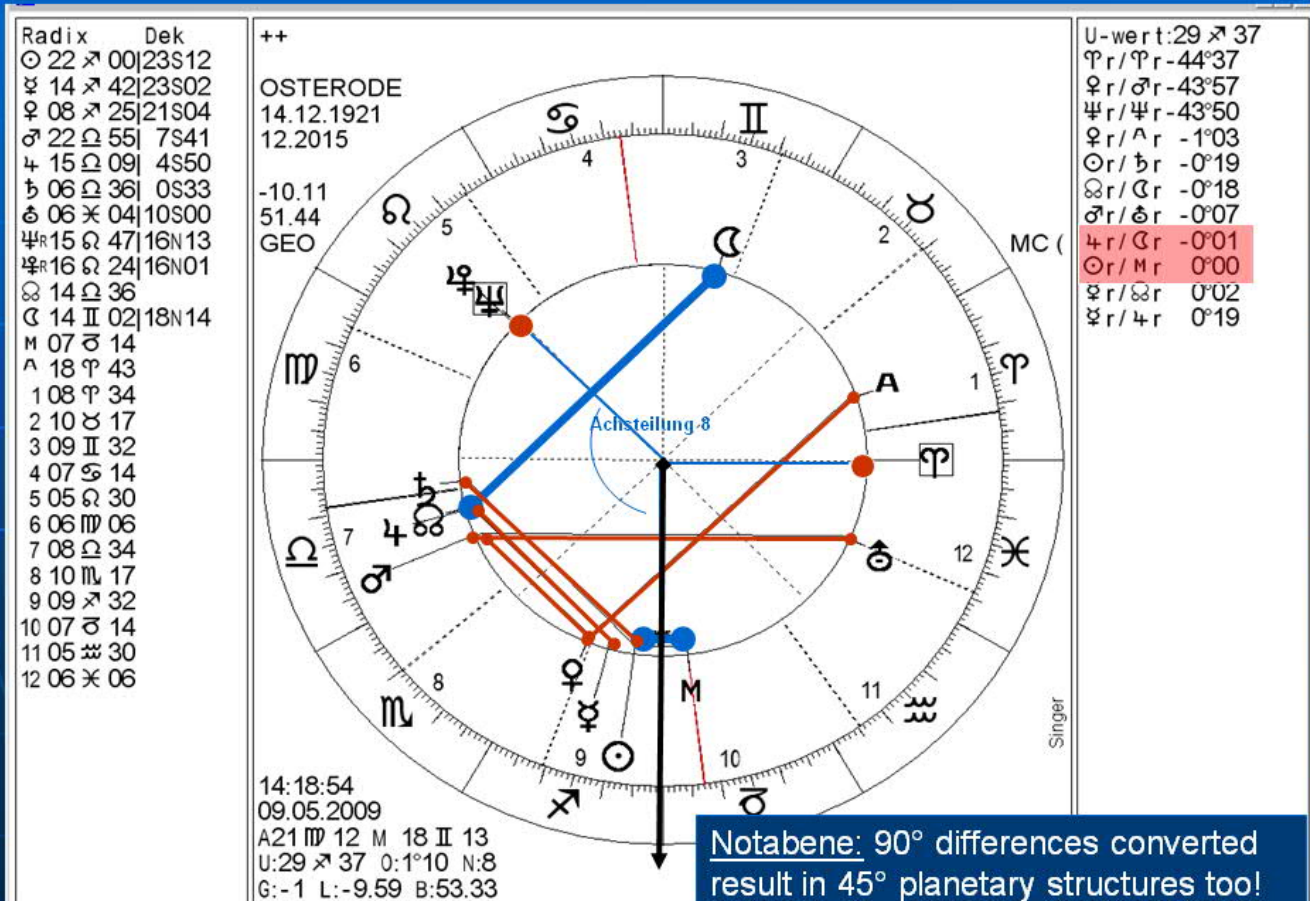

$$\text{MC} + \text{SU} = \text{JU} + \text{MO}$$

Soul and body = Faith / happy (bright) hours

Or expressed as midpoint:

$$\text{MC} / \text{SU} = \text{MO} / \text{JU}$$

The differences  $MC - MO = SU - JU$ , arc of sun (Sb):  $66^{\circ}50'$ , converted as midpoints  $MC / SU = MO / JU$  (transformed) - in the picture with their structures!

Example:

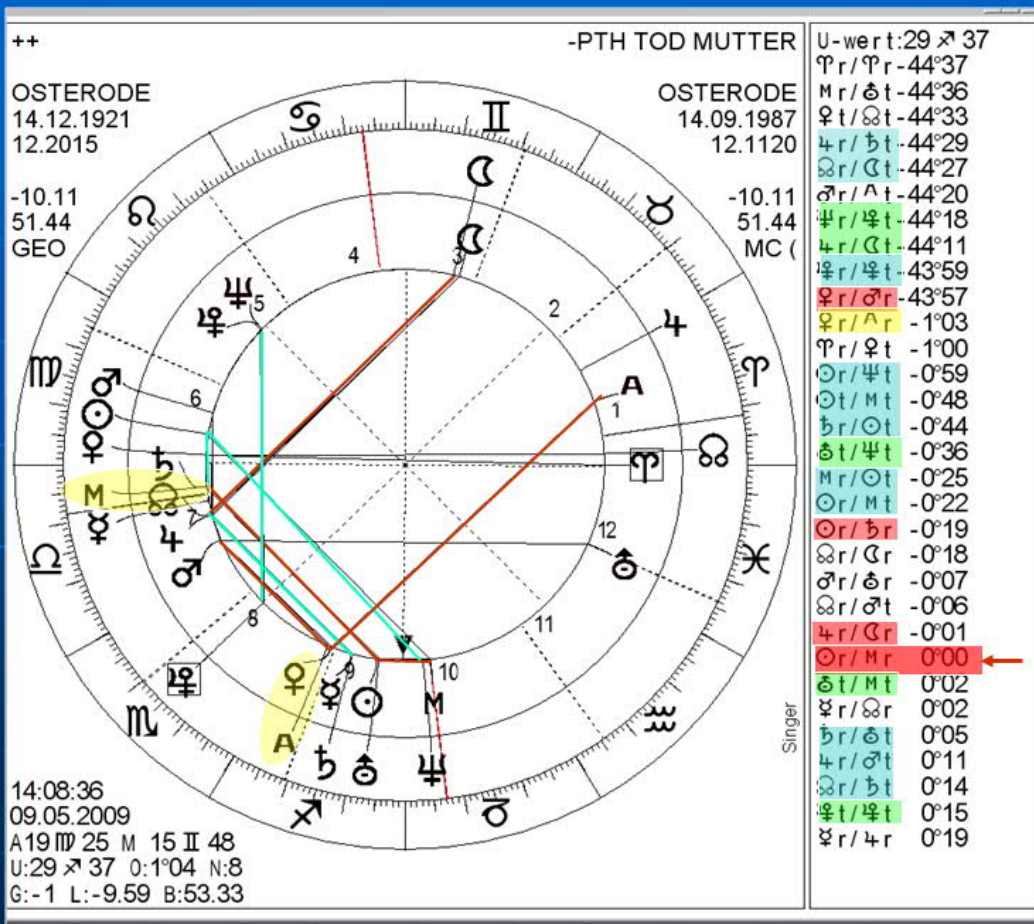

Differences ready for triggering

$MC-MO = SU-JU$  (Sb:  $66^{\circ}50'$ )

transformed as midpoints

$MC/SU = MO/JU$

The relevant difference is indicated (specified) as **Mo – Ne** and in the **radix chart** as working axis adjusted (configured) Dissolution of community, emotionally and mentally connected community. Furthermore you will see MA+SA-KN = JU – the quick death -.

In the **transitory area (sector)** there appears MO - SA again and MA directly on its radix position. The other positions (connections) show the personal sympathy and shock (commotion).

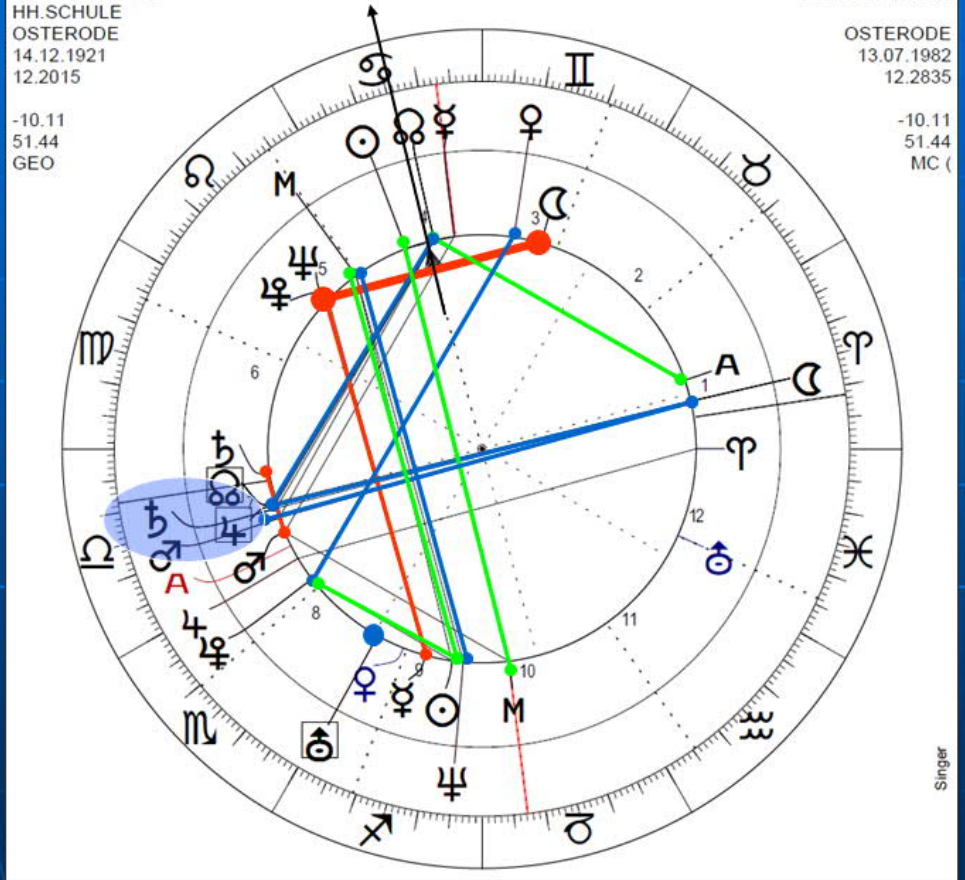

**Transit – radix**

The mixed up connections now touch upon the factors in the radix chart positions which are affected (concerned). That means, ASr is connected with the KNt and thus to Jupiter too – the quick separation (disconnection). The mutual connection of MC und SU rt shows us the strenght of this connection. Important remains the closeness of the MA-SA-connection transitory to that of the radix chart.

**back to the  
personal**

 **horoscope chart of  
the day (pTH)**

Alfred Witte out of the „true“ sun arc horoscope (1 individual sun day = 1 year of life) educed (evolved) the movement pattern of a **daily-MC** (which is contingent on the actual transit **SU**t) which within one year will go on about **361°** and will then coincide with the progressed **MC**v of the sun arc one year later.

This MCw (by Witte) shows the actual daily connections in the **progressed sun arc chart**.

The daily-MC by Witte will be calculated:

$$MCw = (MCv - SUr + SUt)$$

$$MC_{pTH} = (MCr - SUr + SUt)$$

If you use personal daily horoscope chart (pTH) you will see the same ratio (proportion) to the radix chart.

As an example, (same day):

$$MCw = SU/JUv$$

$$MC_{pTH} = SU/JUr$$

In the simplification the result is:  **$(MC - SU)r = (MC - SU)_{pTH}$**   
 You always will get the same ratio (proportion) of differences between pTH and radix

The day-transit always will be calculated for the place of birth which means the time showing the same proportions (ratio) of differences like  $SU_r - MC_r$  transitory, therefore  $SU_r - MC_r = SU_t - MC_t$ .

(The timely calculation basis of the pTH during the course of the year - depending on the seasonally progress of the transit SU - will be a difference of maximum +/-20 minutes of time compared with the birthtime)

The same ratio between MC and SU is the beginning of the **individual new day for the native** (analogous too for the single days in the mundane yearly horoscopes) and thus most precisely corresponds to the contents of experience of the current day until the corresponding constellation of the next day.

The relations of the so called personal factors, as e. g. (f. i.)

SU, MO, AS und MC by this are individualized to the corresponding radix horoscope.

**Radix chart (horoscope)**

**Calculated to the identical  
value of differences  
 $(SU - MC)_r = (SU - MC)_t$**

**Identical geographical data  
(place of birth)**

**pTH (day of event)  
Validity in terms of time = 1 day-cycle**

**Advantage1:** You may use the pTH as a normal day-event-horoscope, you do not even need the exact time of event!

**Advantage 2:** If there are known some data (of time) of events of the life of a native`s life, it is quite simple to correct or justify the horoscope chart [time] by the pTH's.

**Problem:** Because the pTH is effective only from valid (SU-MCt) pTH to next ca. 1 day later, you need be shure to assign data of events to the correct, cycle of day.

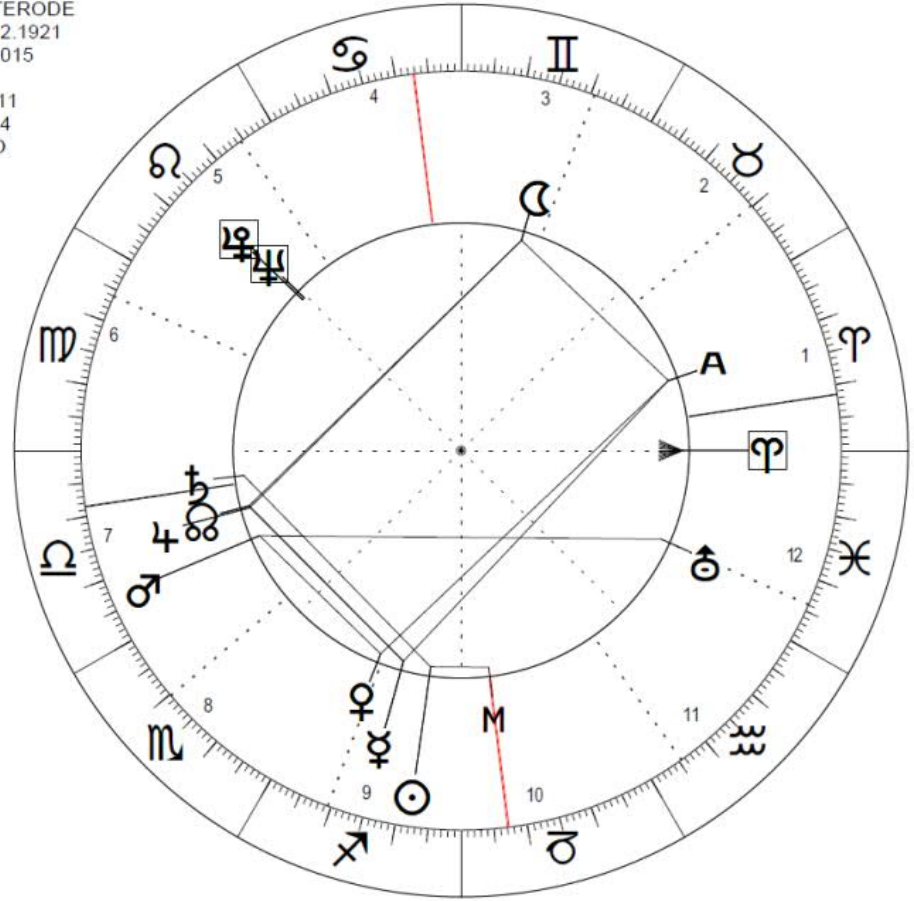

Example: Birthtime: 12:15 h GMT; event on Oct.10.2000, 08:15 h GMT

The validated pTH dates from Oct.09.2000 - not from the day of event Oct.10. -, because the latter is valid only [starting] from ca. 12:15 h.

This requires the **strict compliance of the transiting MO**, which is the only factor in the pTH transiting every day several longitudinal degrees!

In the **houses of earth** manifest themselves the connections to the community respectively to the general public .  
 Here **all relevant personal points** are connected with each other.  
 That means that whatever will happen in the life of a native it shows a relatively (comparatively) strong external impact.

### Remarks concerning systems of house cusps

Here is the **SU-horoscope**. It provides informations regarding the bodily connections of the native.

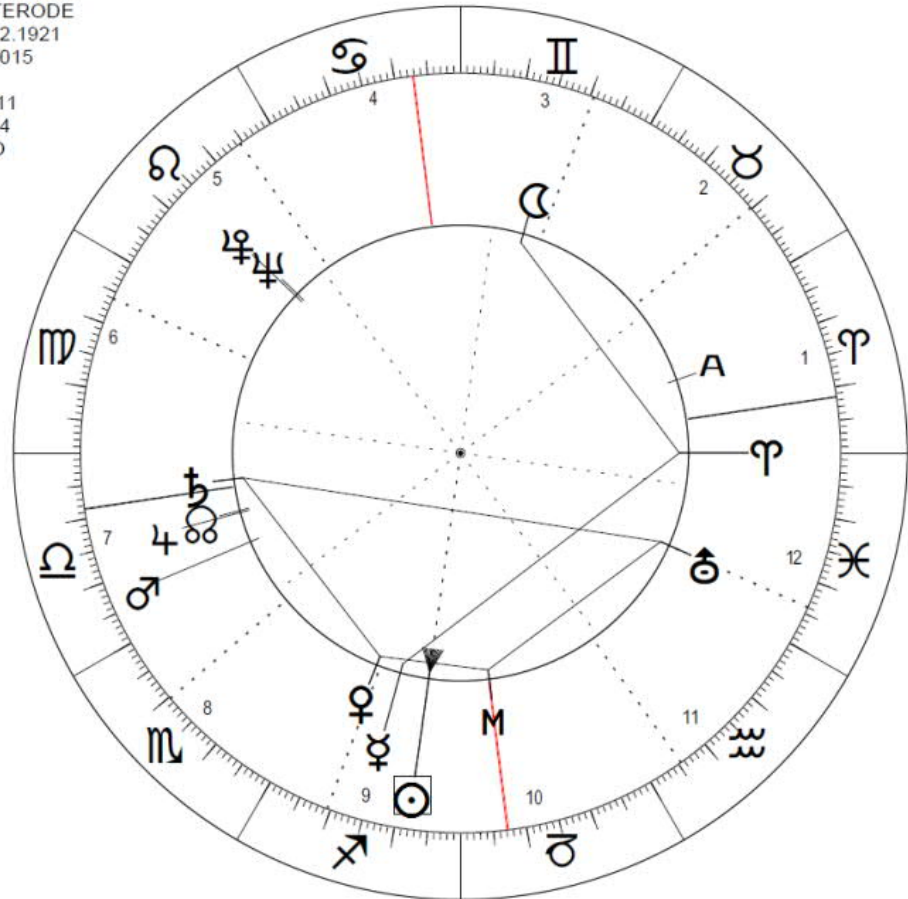

- Here a bodily attractive person is involved,
- Sensible of his charismatic effect,, which person occasionally
- tends to somewhat exzentric actions; -
- popular (liked) in the public and having contacts to the public by speech and writings by means of personal contacts.

House positions:

- JU SA KN (Node) in the 1.SU-house, contentment but separations and restrictions within the family too.
- MA 2.H. – Work for living with the effect of frequent separations of his own family.
- 3.H VE and ME: often on the way on little journeys, good connections to his nearby sphere (environment) and therefore] much correspondence and conversations.
- NE - CU 11. SU-house: bodily near, friendly communities underlie the dissolution / separation or exist under predicaments; or misunderstandings by friendly medial communities.

**Ascendent houses** relate to the direct sphere of the native in which environment he was born - And therefore relate to the effects to himself:

- There are problems in the community of male persons or between male persons who restrict (limit) him.
- (JU/KN)/MA point strongly to the work (activity), coworkers (staff members) or partners;
- Meetings mainly are characterized by the working tasks.
- NE and CU in the 4. AS-H in connection to the SU in the 9.H signifies problems in the homely community when bodily absent or on a journey.
- The MO-position in the 2. house means the female amount (ratio) in the gainful activity (working life) and variable earning capacities.

### MC-houses:

- The native has good connections to the public and to partners,
  - works willingly (readily) and earnestly and sustained,
  - outside of the house and on journeys too;
  - but remains always in emotional solidarity with his parents and his family.
- 
- Because JU/KN is/are burdened (stressed) by MA/SA over and over there occur separations of partnerships due to the common sphere of tasks (work).

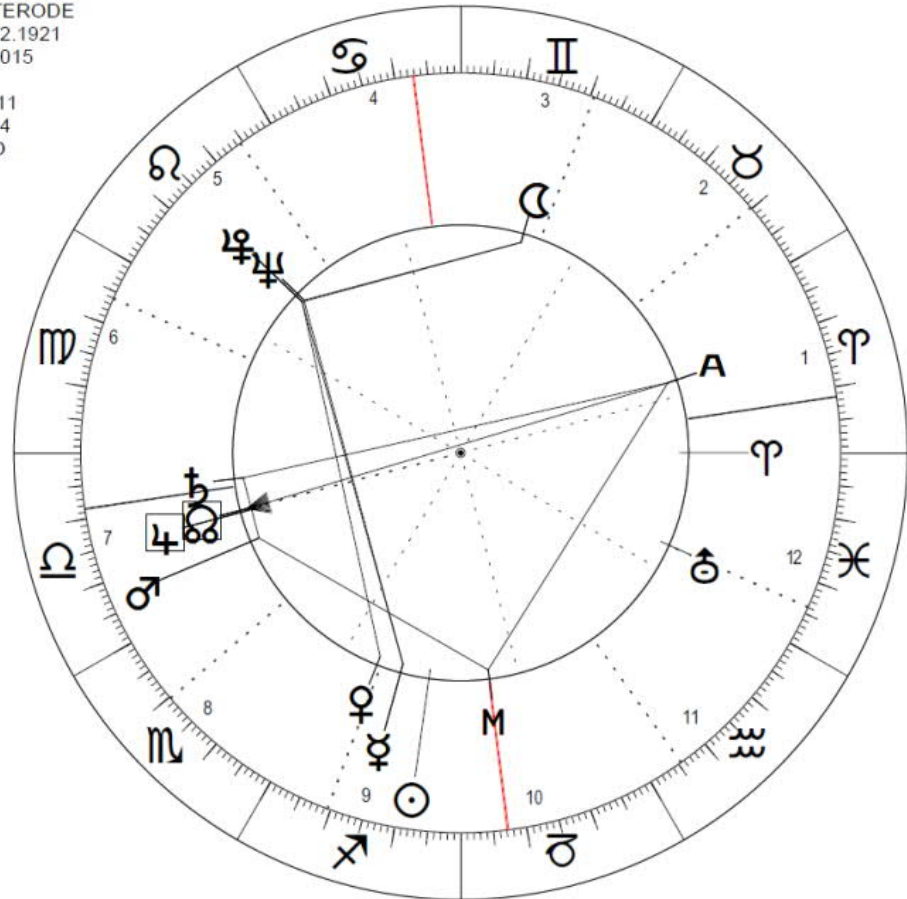

**Houses of the Moon Node**

show us general and family connections.

- MA and JU in the 1. house, signifies happy (bright) connections of work in the parental home,
- connections to medial or religious communities
- primarily to women, but underlying to separations over and over.

**MC pTH - axis**

Tendency

**Structures Transit:**

What happens?

**ASr-axis:**

Tendency  
environment-related

**Structures radix:**

Which individual spheres are related or  
spoken to (my theme, subject, issue)?

**Connections from transit- to radix-factor:**

Which individual spheres underly how or  
which kind of change (alteration)?

**Witte:** The transit SU (in the pTH additionally the MC as analog(ue) personal progress of the day) may be seen as the pointer of the day in the AS-horoscope.

**MC-axis of the pTH:**

The personal dismay (concernment) (red structures), which will influence (impinge) the native on this day – Theme, issue –

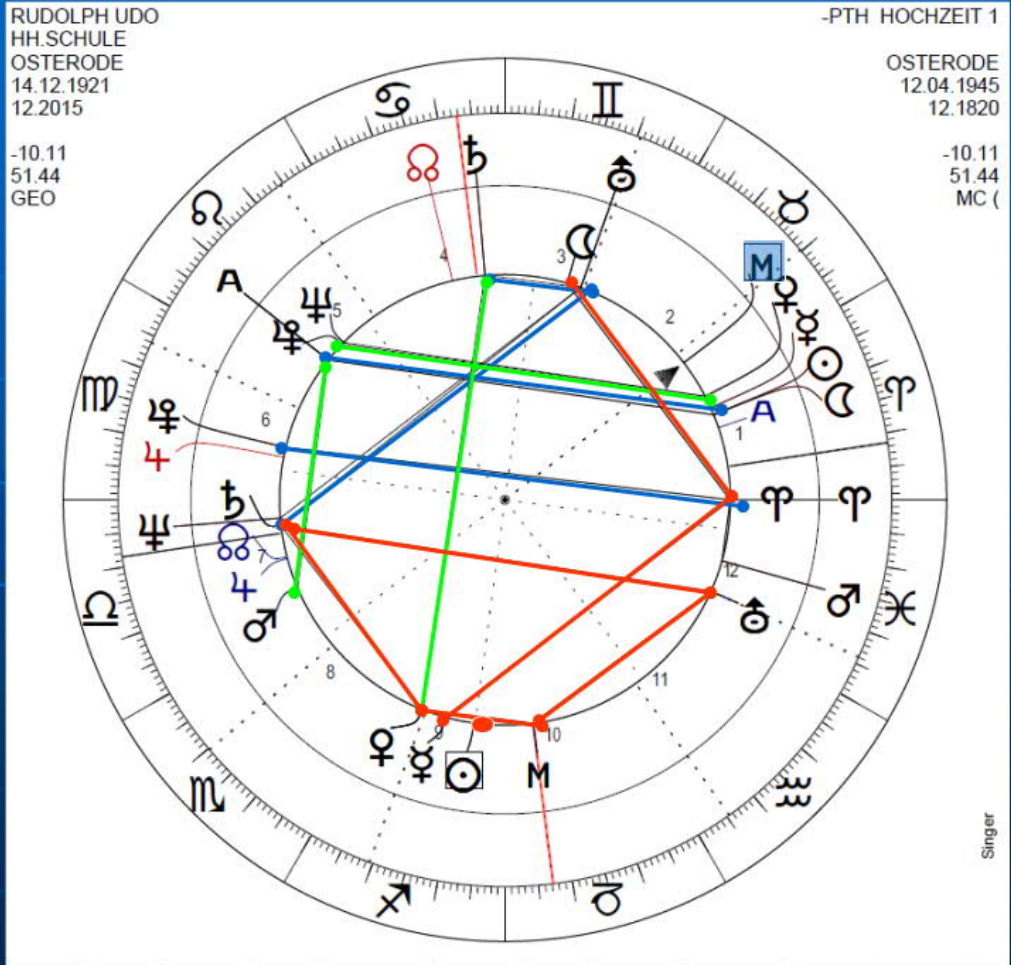

- Being in the public with his wife, - conclude contracts in the public – but too by the concerned (affected) sun-axis
- Interruption, separation and controversies in the supposed love.

In the **transit-horoscope** you notice (see blue structures)

- Separation and dissolution, but also the classical factors AS / (SU/MO)t = AS/MET = WI/CUT
- public, contractually connection with wife. But the picture is repeating: SA/Ur docked to the axis SA/URr, represented in the involved SUR-axis. I. e. (id est), there is a connection between man and woman, which obviously already in the radix-horoscope-chart determined by a sudden separation.

**What does this day effect in the person: Analysis on the transitory connections to the involved radix-positions.**

SAto VER – the separation of love, VEtto CUR, VEtto NER, - this means the instable transfigured community/ marriage.

The same point from the view of the AS-radix -, why?, because in the AS-horoscope resp. in the AS-axis the influences of the outside world / environment are represented. In connection to the transit (actual) horoscope resp. to the pTH or to an event horoscope, you will see changes / modifications and influences, which take effect upon my environment and upon myself too.

The Ego, the Self, indicated by the MCr, in the course of life in principle shows later on only the effects, which take effect by means of my environment to myself. But these may be seen in my AS-axis.

**Back to the horoscope of marriage:**

the AS-axis in its connections to the pTH best represents, what in and by my environments will happen. I myself am in the same manner impressed, therefore this is a good good indicator for what happens.

- The happy connection between man and wife, they are in the public, building an energetic community The MCT is involved.

Under the condition of SU/NE = SU/CU in the axis here we see the groom/ husband; - with KN/MET = KN/(SU/MO)t and MCM/lt we see the hedge by contract.

- by the position of SU, MO, ME, VE, MC in the 1.AS-H, is seen the entrance in the direct environment by a young loved lady.

**The real effects in the horoscope may be seen again in the radix-concernment by the transiting factors:**

KN/JU is triggered by the transit factors ME SU MO - again classical constellations, which point to the undertaking of a firm and happy connection or marriage, especially because transitory both factors AS/MA and AS/CU and KN SU MO ME show the same issue.
